The Adviser has contractually agreed to waive its fees and/or absorb expenses of the Fund to ensure that net annual fund operating expenses (excluding acquired fund fees and expenses, interest, taxes and extraordinary expenses) do not exceed 1.39% of average daily net assets of the Investor Class and 0.99% of the average daily net assets of the Institutional Class. This contract's term is in effect through at least February 27, 2020, and may be terminated only by the Trust's Board of Trustees (the "Board"). The net expense ratio represents what investors have paid as of the prospectus dated 02/28/2019.

From time to time the Fund may invest in shares of companies through initial public offerings (IPOs). IPOs have the potential to produce substantial gains. There is no assurance that the Fund will have continued access to profitable IPOs and as the Fund's assets grow, the impact of an IPO investment may decline. Therefore investors should not rely on these past gains as an indication of future performance.

Performance data quoted represents past performance and does not guarantee future results. The investment return and principal value on an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance of the Fund may be lower or higher than the performance quoted. Performance data for the most recent month end may be obtained by calling 888-482-3726 (888-HUBERCM) or visiting our web site at www.hubercap.com. The Fund imposes a one percent redemption fee on all shares held 60 days or less. Performance data quoted does not reflect the redemption fee. If reflected, total returns would be reduced. Investment performance reflects fee waivers in effect and in the absence of such waivers, total returns would be lower. Investor Class shares were originally offered on June 29, 2007; Institutional Class shares were originally offered on October 25, 2011. Performance shown prior to the inception of the Institutional Class reflects the performance of the Investor Class and includes expenses that are not applicable to and are higher than those of the Institutional Class.

The S&P 500 Index is a broad based unmanaged index of 500 stocks, which is widely recognized as representative of the equity market in general. The Russell 1000 Value Index measures the performance of those Russell 1000 companies with lower price-to-book ratios and lower forecasted growth values. The index does not reflect the payment of transaction costs, fees and expenses associated with an investment in the Fund. The Fund's value disciplines may prevent or restrict investment in major stocks in the benchmark indices. It is not possible to invest directly in an index. The Fund's returns may not correlate with the returns of their benchmark indexes.

Mutual fund investing involves risk. Principal loss is possible. Investments in foreign securities involve greater volatility and political, economic and currency risks and differences in accounting methods. The risks are greater for investments in emerging markets. Additionally, the Fund is subject to sector emphasis risk meaning that companies in the same or related businesses may comprise a significant portion of a Fund's portfolio and adversely affect the value of the portfolio to a greater extent than if such business comprised a lesser portion of a portfolio.
