Huber Mid Cap Value Fund	Institutional Class	HUMEX	0.27864218	None	None	0.27864218

General information is available in the Distributions and Tax Section of the Prospectus.

Mutual fund investing involves risk. Principal loss is possible. Investments in foreign securities involve greater volatility and political, economic and currency risks and differences in accounting methods. The risks are greater for investments in emerging markets. The Small Cap Value Fund will invest in smaller companies, which involve additional risks such as limited liquidity and greater volatility than larger companies. Additionally, the Funds are subject to sector emphasis risk meaning that companies in the same or related businesses may comprise a significant portion of a Fund's portfolio and adversely affect the value of the portfolio to a greater extent than if such business comprised a lesser portion of a portfolio. Investments in Initial Public Offerings (IPO) carry additional risk such as market and liquidity risk and can fluctuate considerably. When the Fund's asset base is small, the impact of IPOs on the Fund's performance could be magnified.
