Projected P/E Ratio: Is the weighted harmonic average of projected P/E ratios of the companies invested in the portfolio, which ratios represent current market price per share divided by a company's estimated future earnings-per-share. Projected earnings are consensus analyst forecasts; actual P/E ratios may differ from projected P/E ratios. The projected P/E ratios of the portfolio and indices may not have any relation to the performance of the portfolio. Price/Cash Flow Ratio: Is the price of a stock divided by its cash flow per share. Price/Book Ratio: Is the price of a stock divided by its book value.

The Bloomberg U.S. 1000® Value Index is screened from the Bloomberg U.S. 1000 Index and is constructed based on a linear combination of risk factors. The four factors are: 1) Earnings Yield, 2) Valuation, 3) Dividend Yield and 4) Growth. The factors are equally weighted when forming a composite signal where Growth is considered to be a negative indicator and thus flipped to be a negative. The Index is market-capitalization-weighted. The index does not reflect the payment of transaction costs, fees and expenses associated with an investment in the Fund. The Fund's value disciplines may prevent or restrict investment in major stocks in the benchmark indices. It is not possible to invest directly in an index. The Fund's returns may not correlate with the returns of their benchmark indexes.

Fund holdings and sector allocations are subject to change at any time and are not recommendations to buy or sell any securities.

Mutual fund investing involves risk. Principal loss is possible. Investments in foreign securities involve greater volatility and political, economic and currency risks and differences in accounting methods. The risks are greater for investments in emerging markets. Additionally, the Funds are subject to sector emphasis risk meaning that companies in the same or related businesses may comprise a significant portion of a Fund's portfolio and adversely affect the value of the portfolio to a greater extent than if such business comprised a lesser portion of a portfolio.
