**OBJECTIVE:**

The Huber Mid Cap Value Fund seeks to achieve current income and capital appreciation using a value-based investment philosophy. Through our disciplined approach and rigorous independent research, we attempt to identify out-of-favor stocks that represent solid fundamental value. The Fund also normally invests in stocks with high cash dividends or payout yields relative to the market. The Fund typically holds securities of companies with a market capitalization range between \$100 million and \$90 billion.

**INVESTMENT STRATEGY:**

- ✓ Disciplined and consistent approach
- ✓ Rigorous in-house fundamental research
- ✓ Exploitation of behavioral heuristics
- ✓ Bottom-up stock selection
- ✓ Emphasis on dividend paying stocks

**ADVISOR:**

Founded in Los Angeles, CA in 2007, Huber Capital Management is an independent 100% employee owned investment boutique committed to a consistent and disciplined value approach that combines best practices in fundamental research and behavioral psychology. Huber Capital manages assets for institutional and mutual fund investors across all value strategies.

**FIRM HIGHLIGHTS:**

- ✓ Experienced team
- ✓ Singular focus on fundamental research
- ✓ Commitment to a small asset base
- ✓ 100% employee owned
- ✓ Tax awareness

**SECTOR BREAKDOWN - As a % of Total Equity**

\*\* The Adviser has contractually agreed to waive its fees and/or absorb expenses of the Fund to ensure that net annual fund operating expenses (excluding acquired fund fees and expenses, interest, taxes and extraordinary expenses) do not exceed 1.40% of average daily net assets of the Investor Class and 1.10% of the average daily net assets of the Institutional Class. This contract's term is in effect through at least February 28, 2026, and may be terminated only by the Trust's Board of Trustees (the "Board"). The net expense ratio represents what investors have paid as of the prospectus dated 02/28/2025.

\*\*\* While the fund is no-load, management fees and expenses still apply. Please refer to the prospectus for further details.

Projected P/E Ratio: Is the weighted harmonic average of projected P/E ratios of the companies invested in the portfolio, which ratios represent current market price per share divided by a company's estimated future earnings-per-share. Projected earnings are consensus analyst forecasts; actual P/E ratios may differ from projected P/E ratios. The projected P/E ratios of the portfolio and indices may not have any relation to the performance of the portfolio. Price/Cash Flow Ratio: Is the price of a stock divided by its cash flow per share. Price/Book Ratio: Is the price of a stock divided by its book value.

The Bloomberg U.S. 2500® Value Index is screened from the Bloomberg U.S. 2500 Index and is constructed based on a linear combination of risk factors. The four factors are: 1) Earnings Yield, 2) Valuation, 3) Dividend Yield and 4) Growth. The factors are equally weighted when forming a composite signal where Growth is considered to be a negative indicator and thus flipped to be a negative. The Index is market-capitalization-weighted. The index does not reflect the payment of transaction costs, fees and expenses associated with an investment in the Fund. The Fund's value disciplines may prevent or restrict investment in major stocks in the benchmark indices. It is not possible to invest directly in an index. The Fund's returns may not correlate with the returns of their benchmark indexes.

Fund holdings and sector allocations are subject to change at any time and are not recommendations to buy or sell any securities.

Mutual fund investing involves risk. Principal loss is possible. Investments in foreign securities involve greater volatility and political, economic and currency risks and differences in accounting methods. The risks are greater for investments in emerging markets. The Mid Cap Value Fund will invest in mid-cap companies which have less liquidity and greater volatility than larger companies. Additionally, the Funds are subject to sector emphasis risk meaning that companies in the same or related businesses may comprise a significant portion of a Fund's portfolio and adversely affect the value of the portfolio to a greater extent than if such business comprised a lesser portion of a portfolio.
